Before leaving for the Pass, complete any quest business you may sell your enemy drops. In many games it pays to max out on health. However, you are recommended to be cautious about spending money. You will find many items if you explore, and the more you keep you at this stage, the better. The second Tutorial book in the Main Square now appeared by the exit to the World map.

The developers took their previous game "Plexarium" and turned it into this horrible mess.

It's not even worth ninety-nine cents. It's completely broken and an utter disaster.

Movement controls are horrid at best. Clicking on cubes doesn't register most of the time.

No visual clue to re-enable cubes you've disabled.

And there's no way to predict which direction the orb will go, since all the cubes look exactly the same.

I guess they were trying to recoup the lack of sales on their last game.

Instant refund.. I've been having a BLAST with this game. Dev has been very attentive and engaging over Reddit. So far this is one of my favorite VR games. It's pretty basic arcade gameplay. No intricate upgrade systems or any fancy attempts to add rougelike elements.

Just straight up FUN gameplay. For anyone who played with toy spaceships as a kid who wants to actually fly one around in space shooting bad guys, THIS is the game to pick up!

I've heard it compared to a couple other titles, but personally haven't found anything that hit the spot like this game.

It's a unique design that doesn't try too hard to be different. Great sound and music, and very satisfying imagery with plenty of explosions in space. I expected to like this game after playing the demo, but I didn't expect to enjoy it THIS much. I grew up loving everything about the space/sci-fi genera and always imagined I'd need to be flying first person, in the cockpit to get this much enjoyment out of a space shooter, but the truth is I like this better than any other space shooters in VR that I've played so far.

What's even cooler is you can download a demo to try it out for yourself before buying. I personally paid \$14.99 for it during Steams Winter sale, and I'll be completely honest I don't even regret paying more than the current price. One reason for that is that one of my motion controllers was broken for about a week and a half so having a game I could play with one controller saved me a ton of grief for those 9 days (felt like a couple months) before deciding I could just fix the thing myself.

That's all beside the point. Try the demo, if you like it even a little it's definitely worth the current price for the amount of enjoyment you'll get from it. Not to mention it's decent workout dodging all that incoming fire. Just keep your chaperone on or you'll be tempted to chase a powerup through a wall.. <https://youtu.be/wxEV1KzB7YI>

[A brilliant setup and visual style are made almost inaccessible by the limited options present to players. With no obvious way to buffer the difficult curve many will be turned off completely.. It's like high school gym class all over again, except without the self loathing and welts. :\(good game tho. This game is pretty fun, at first everything you do is taxing on your body. HOWEVER that's what leveling up is for! You can level up certain stats that allow you to make certain chores easier on you, such as holding items \(which all have weight\), chopping wood, fishing, farming, and also hunting! The game has some bugs right now such as animals having superspeed quirks, but aside that minor issue the game is great even as an early access! It just needs more content, which i'm sure they're already working on.](#)

[The game does a good job giving you a simple and fast tutorial using a small amount of text, which surprisingly explain all you need to do. Plus these quests give you EXP so easy level up, and makes the journey early game easier.](#)

[I think the beginning quest for potato seeds should be changed however. I completed the quest once, but when i did my second playthrough i literally spent a whole hour looking through cars looking for potato seeds. I had 7 carrot seeds and 8 turnip seeds and had found no potato seeds within that hour. I think the quest should be changed to any seeds xD. great fun game. prob the best hunting game ever. still play it. no tunnel style travel. completely open world. and the option of a horse is always nice . I LOVED this game. The price is a hell of a deal even for a single play through- mine took me 23 hours and I'm a very fast reader. The fact that there's countless other routes I can take makes the replay value impressive. The story itself was surprisingly well written and the characters were fleshed out. I look forward to playing it again to try and deviate from the direction I went in this first time- it seems like the story can change drastically depending on the decisions.](#)

even for free i wouldnt recommend it
its so buggy

its a tropical island rendered in nintendo64/playstation1 graphics
all you can do is teleport around and glitch through walls, towers, rocks, the water etc
oh and collect shells, you can collect shells... and apples... for what? who knows!. This is only chapter one, and it's insanely good.

I want to know what's going to happen next now !. Best game in the history of ever. 11/10 would touch a somebody's spaghetti again.. At the moment i find it to much slow moving! There is lot of irretating sounds like constants heartsbeats! The grafic of the opposites figures is look like ghosts in suits (simpl)!In the short time of trying to kill this monsters there was not much to see if they were hit by firing on them! And then after a little long time they die like they were fainting\pass out in a strange way of falling! But the grafic part looking acceptable... So far what i pay it was not yet a bad game to play! So i hope it gonig all much better than what i have said!. Frist I love this locomotive because of the detail of the unit and how nice the cab with opening doors and windows. The beacon on the locomotive works. The wagons that come with the locomotive are very cool+a caboose. If you want to see the locomotive look a my screenshots I do recommend this locomotive.. This is the best software for making games, every thing in the video is true, exsept its better!. i've been using different variations of this for years, works great, easy to use. now that i found it on steam, even better, record video games, edit, and upload.. This is a vary nice route add on with sme spectacular scenery. I have also noticed that since installing Windows 10 Train Simulator runs more smoothly than with Windows 8.1.

I love the sounds and look of the diesel powered locomotive. My only disappointment is the lack of passenger view.

Other than that this has to be one of the best TS add ons to date.

I wish they'd do a Reading to Londo Waterloo route. :-D
